About us

MENGI International drilling limited is a sister company of Mengi Business company limited which consists variety of business lines since 2016 to update. We are one of the professional drilling companies in Tanzania. Our extensive fleet enables us to provide drilling services across all phases of the mining cycle, from greenfields exploration to mine-sites, in both surface and underground mining operations.

Our reputation is built on an unwavering commitment to safety, delivering professional drilling solutions - even in the most remote and challenging environments - and achieving operational efficiencies for our customers.

We develop long-term relationships with our clients as a result of our consistently professional and productive service delivery. We provide:

- High rig availability and optimal asset performance, while minimizing downtime and maintenance costs via our young fleet and preventative maintenance programs;
- Monitoring and continuous improvement of safety processes and visible safety leadership across all levels of our Company and operations - our excellent safety record is evidence of our team's commitment to a safe workplace;
- Capability to react and adapt quickly to changes in drilling programs through our large fleet capacity;
- A solutions-focussed approach where our experienced teams use their in-country expertise and operational knowledge to add value to all aspects of drilling operations; and
- Thorough communication and reporting processes that deliver ongoing project improvement initiatives.

At Mengi International Drilling Limited we provide full-service drilling solutions to customers within the minerals industry, focusing on the African markets.

Our drilling services include blast hole, delineation, directional, exploration, grade control and underground drilling.

Our Vision

Our vision is to become a leading provider of drilling services, with great focus on delivering high-quality, safe, and efficient drilling solutions to meet client needs and contribute to sustainable resource development.

Industry Leadership:

We want to be recognized as a leading provider of drilling services, known for innovation, safety, and reliability in Tanzania and globally.

Sustainable Resource Development:

To contribute to the sustainable development of mineral resources by providing efficient and environmentally responsible drilling solutions.

Global Presence:

To expand operations and establish a strong presence in key mining regions worldwide.

Technological Advancement:

To be at the forefront of drilling technology, continuously investing in research and development to improve efficiency and safety.

Our Mission

Safety First: To prioritize the safety and well-being of all employees and ensure a safe working environment.

Client Satisfaction: To deliver high-quality drilling services that meet and exceed client expectations, building strong and lasting relationships.

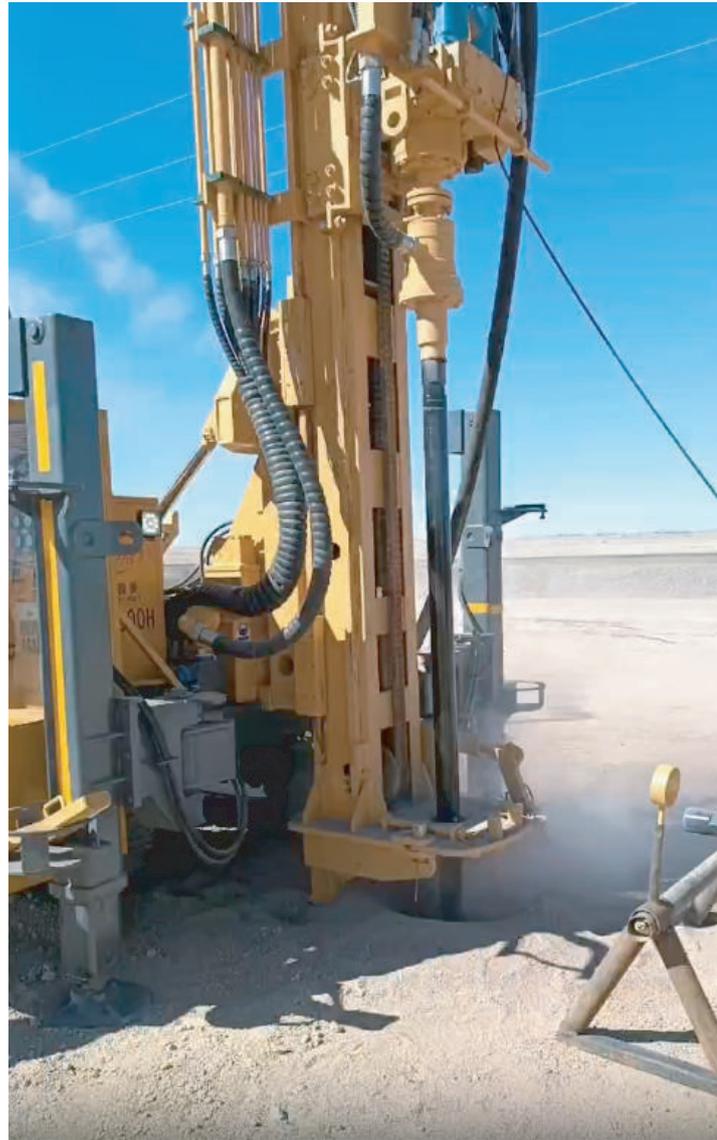

Operational Excellence: To operate with efficiency, cost-effectiveness, and a commitment to continuous improvement.

Environmental Responsibility:

To conduct drilling operations in an environmentally responsible manner, minimizing impact on the surrounding environment.

Innovation and Growth:

To foster a culture of innovation and continuous growth, both for the company and its employees.

We always strive to ensure environmental and ecological safety across all our operations and works.

Our Value

Teamwork, Integrity, Accountability, Community, Safety and Health, Result Driven.

Safety

Uphold our exceptional health and standards and focus on everyone's well-being.

Respect

Respect colleagues, clients, the environment and the cultures and communities where we operate.

Unity

Operate as fully inclusive company team.

Integrity

Be frank, honest, and open, developing relationships and seeing things through to completion.

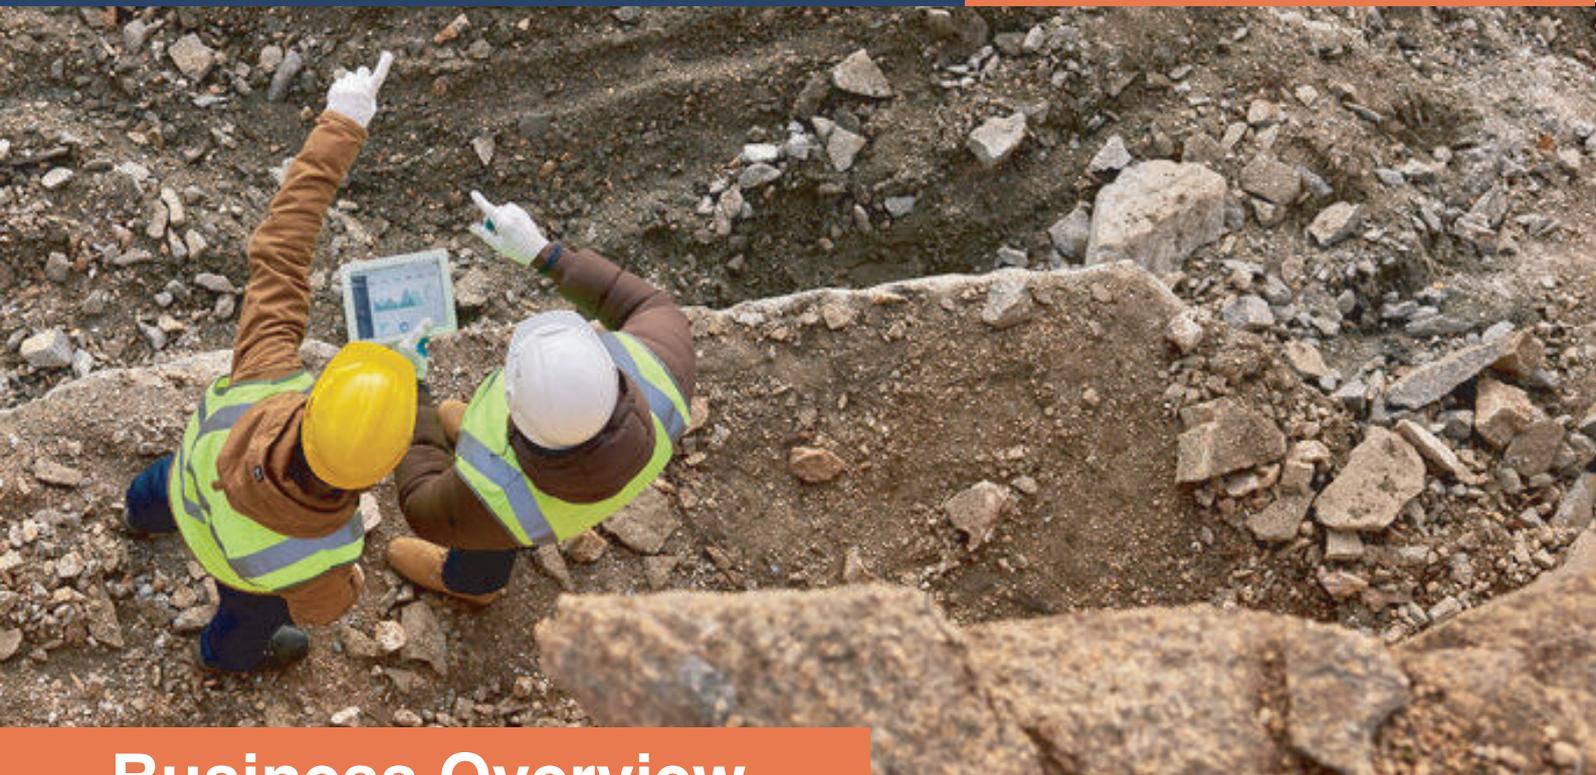

Site in DRC Congo

Sustainability

Identify, develop and impliment initiatives to lessen our environmental impact.

Exellence

Be responsive, innovative and entrepreneurial, taking ownership and always striving for the best outcomes.

Business Overview

Who we are

- High growth drilling company providing services to mining, exploration & energy companies.
- Focus on emerging & developing markets.

What we do

- Exploration, development and production drilling in Tanzania.
- High quality, long standing customer base

Where we Are Headed

- Robust demand environment driving record revenues.
- Significant expansion opportunities with existing & new clients.
- Increasing management depth & new debt facilities to drive further growth.

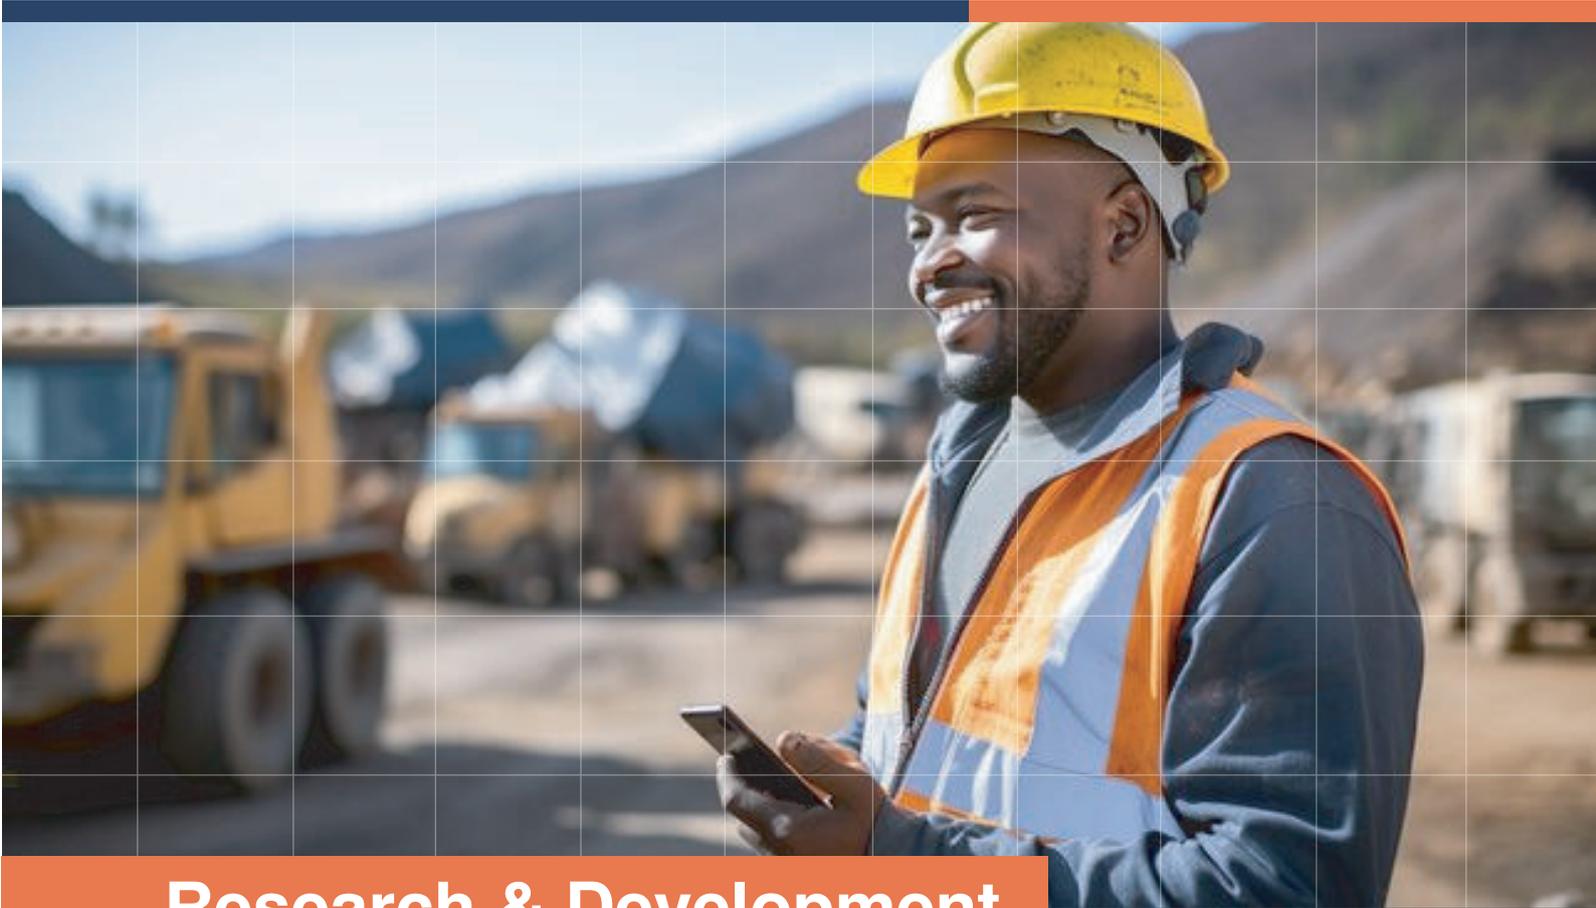

Background

Mengi International Drilling Company Limited is a private owned drilling and mineral exploration company in Tanzania with a demonstrated history in successful mineral drilling and exploration. Accordingly, Mengi International Drilling was able to earn its position as one of the top ten Drilling company in Tanzania who doing the best in mineral field. Mengi International Drilling is more than aware of its responsibility to join forces with the hard-working, courageous, and strongly determined Tanzanian's people aiming to achieve sustainable development and national economic growth.

Mengi International Drilling is an inclusive, self-sufficient, all-in-one provider of a wide range of services and solutions within the settings of drilling and mineral exploration. We actively providing all these types of services for mining drilling and mineral exploration projects. Making use of state-of-the art technologies, innovative solutions, and globally recognised best practices, our experienced engineering teams are more than ready and prepared to answer to all the needs of large scale mining exploration projects of precious minerals. Our clients and customers always enjoy world class optimum quality services and solutions for drilling and mineral exploration.

Through our engineers, Mengi International Drilling benefits from its experience and technical knowledge in providing a diverse variety of customised and tailored services and solutions to investors and businesses including decision-making support and assistance; data collection and analysis; reserve evaluation; feasibility and market studies; business modelling and development; in addition to risk management planning.

Research & Development

As a leading corporation with great future ambitions, research and development efforts played an integral role in our successful integration of innovation into our works and operations throughout our history. Our path towards achieving innovative industrial and institutional modernisation was always guided and directed by substantial research and development.

We are always ready to share and make available our experience in research and development to introduce new technologies in various areas of our work including downstream activities-particularly within the settings of mineral drilling and exploration.

Our immediate objectives within this regard include developing innovative technologies able to incorporate environmental and ecosystem safety concerns including water resources safety as well as energy emission constraints.

Drilling

At Mengi international Drilling Limited we have a thorough understanding of the the central role of drilling activities and operation. We stand strong with our extensive expertise and experience to provide the best world-class drilling services and solutions for all mining and mineral exploration projects.

Our approach takes into account the specific needs for each projects: ensuring adherence to all necessary requirements related safety, quality, and cost. The use and utilisation of the best machinery (core drilling and reverse ciectulation machinery) together with cutting edge technologies and techniques, including information evaluation tools, allow our multinational drilling teams to successfully conduct complex drilling operations such as rotary steering - leading to successfully reservoir navigation process

Expansion in Africa

Aware of the immense capabilities and prospects for growth in the mining and mineral exploration Industry in Africa. Mengi International Drilling Limited is more conscious than ever about the necessity to grow bigger in terms of subsidiaries and projects.

We are determined and ready to expand our works in order to impliment our expansion plans in Africa due to the decisive role that the industry can play in achieving development and economic growth objectives in Tanzania and in the continent in general. Our current exploration operations are spread within Tanzania but we are targeting to spread all over the world.

The Environment

As taken into consideration as part of our mission and values, we follow the best emerging trends and Globally recognised best practices aimed at environmentally conscious mining and mineral exploration.

Our solid adherence to the highest standards of health and safety demonstrates our excellence risk management practices and environmental protection precautions.

Safety

The safety and health of all parties and stakeholders as part of the whole mineral drilling and mineral exploration value chain are well taken into consideration by Mengi International Drilling and company limited.

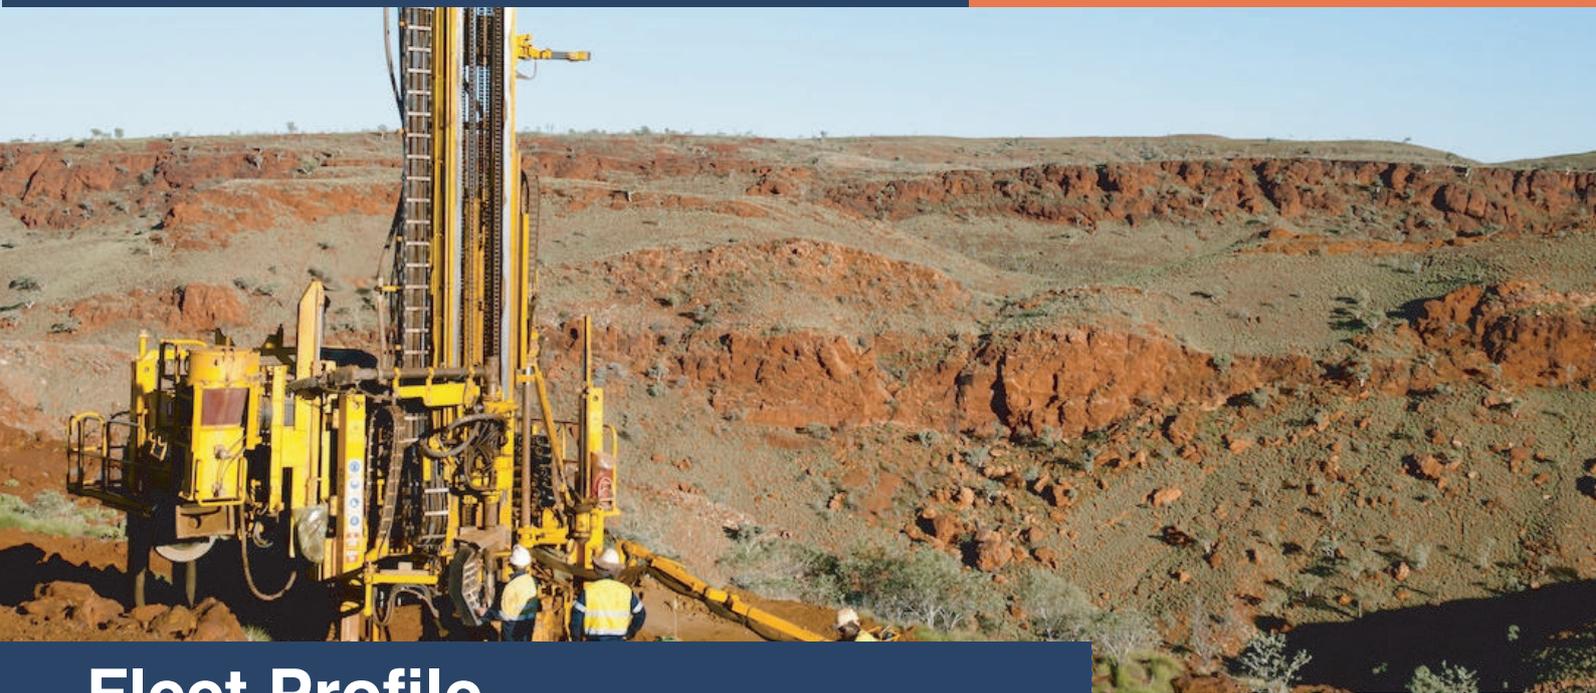

We strongly support and promote the wellbeing and welfare of not just our staff and employees, but also all members of our communities. Mengi International Drilling Limited successful developed and implemented core compliance initiatives consisting of policies, procedures, and training programmes for all staff within emergency management services, performance monitoring, and risk evaluation settings.

Innovation

Throughout its history, Mengi International Drilling Limited was always able to achieve paradigm shifts with regard to its works and operations by relying on innovation and innovative solutions.

As a modernised and ambitious mining and mineral exploration corporation, we are prepared for the future because we place our trust on innovation. Combining the latest scientific research with innovative technologies will always allow us to incorporate innovation within all our business operations.

Fleet Profile

Broad fleet profile to support client bas.

This new, modern land-drilling rig represents environmental and safety solutions as well as technological progress. The rig is designed and manufactured according to regulations. Our rig fleet comprises state-of-the-art, highly versatile equipment engineered to address an array of drilling challenges efficiently and effectively. Each rig is carefully selected and maintained to ensure optimal performance, safety, and reliability in the most demanding environments. Our fleet includes advanced models designed to operate seamlessly in remote locations, underground mines, challenging quarry sites, and untouched greenfield areas.

With a diverse selection of drilling units, we can adapt to the specific requirements of any project, no matter the complexity or scope. Our equipment is capable of executing precise drilling operations that align with industry standards while prioritizing environmental responsibility and sustainability. We focus on providing tailored solutions that maximize productivity and minimize downtime, meeting our clients' needs with the highest level of expertise and technology.

Whether you need powerful drilling for rugged terrains or specialized equipment for delicate operations, our rig fleet is equipped to deliver results that surpass expectations.
